

ROMINA CARABA

DATA SCIENTIST

519 591 9012

romina.caraba@gmail.com

[LinkedIn](#)

[rominacarabathampi.ca](#)

Richmond Hill, Ontario, Canada

Programming Languages: Python, R, Go, PHP, Javascript, JSON, PostgreSQL

Cloud Computing: AWS S3, GCP, Kafka

Frameworks/Tools: PowerBI, Tableau, Git, Docker, REST APIs, Unix, bash, Codefresh

Data Analytics and Statistics: Statistical Modelling, Hypothesis Testing, A/B Testing

2022 • **Nanodegree Intermediate Python**, Udacity, Waterloo, Canada

2019 • **Diploma in Data Science**, Brainstation, Toronto, Canada

2018 • **M.S. in Bioinformatics**, Technical University of Dresden, Germany

2015 • **B.S. in Physics**, West University of Timisoara, Romania

Data Scientist

Metrolinx | *Python, SQL, Power BI, Machine Learning, Data Analysis*

Aug 2023 - Present

- Built and deployed machine learning models to predict train delays with 87% accuracy using historical data and external factors like events, weather, enabling proactive scheduling and resource allocation.
- Designed dynamic dashboards using Power BI for real-time analytics, supporting data-driven decision-making.
- Collaborated with data engineering teams to develop and test data pipelines, ensuring data integrity. Conducted hypothesis testing and applied statistical methods to identify trends and support business goals. Streamlined processes through automation, saving 50 hours of manual repetitive tasks.
- Created documentation and facilitated knowledge transfer for operational readiness, while defining process structures and creating visual charts to improve workflows.

College Professor

Centennial College Computer Science | *HTML, CSS, Linux*

Jan 2023 - May 2023

- Instructed computer science courses (COMP213 and COMP301) at the School of Engineering Technology and Applied Science, managing lectures and laboratory sessions.
- Graded assignments, monitored student progress, and provided constructive feedback to support academic growth.

Software Engineer (Contractor)

Rebuy Engine | *PHP, Javascript, CSS, TestSigma, git*

Apr 2022 - Nov 2022

- Utilized PHP, JavaScript, and CSS to resolve customer tickets, improving customer satisfaction by 20%.
- Designed, coded, debugged, and documented solutions for various tickets, enhancing product functionality and reducing churn risk.
- Conducted QA testing, developed test plans, and utilized the TestSigma automated testing suite to identify bugs and create triage tickets.

Backend Developer

Heliolytics | *Python, GCP, Docker, Codefresh, SQL, git, JSON*

Nov 2021 - Mar 2022

- Developed Python backend code to automate image processing, boosting speed by 50x and eliminating human errors.
- Established automated testing guidelines to identify gaps in the product development lifecycle.
- Managed and customized Docker containers using GCP and Codefresh for efficient deployment.

Backend Developer (Contractor)

Starship Dreams | *Go, Docker, AWS, Rest APIs, SQL, git, JSON*

Nov 2020 - Jun 2021

- Scaled API to support over 1 million users using Go.
- Improved data processing speeds by 100x through the overhaul of legacy databases.
- Saved \$200k annually by automating shipping-related tasks.
- Deployed, customized, and managed AWS Docker containers.

Owner, Web Developer

Minyum Labs | *Wordpress, HTML, CSS, PHP*

Jun 2020 - Oct 2024

- Enhanced online presence for small businesses and non-profits by developing, maintaining, and supporting WordPress websites, along with SEO optimization.
- Analyzed website traffic and implemented cloud deployment to improve user experience.
- Successfully designed and optimized websites for a regional art gallery and e-commerce businesses.

Machine Learning Developer (Contractor)

NovaceneAI | *Python, SQL, Tensorflow*

Mar 2020 - Nov 2020

- Processed and organized 20K bilingual survey responses using NLTK and pandas, achieving substantial data deduplication.
- Developed predictive models to estimate mid-2020 COVID-19 case numbers in Canada based on comprehensive data analysis.
